Top 5 Things to Know about Us

1. We are the only Engineering Technology Department in North Texas.

2. We offer opportunities for students to use excellent laboratories housing state-of-the-art instruments.

3. Our MS in Engineering Management program offers graduate business courses such as Entrepreneurship and HR Management that prepare graduates for today's work environment.

4. Our programs accept diverse students from basic sciences, and various engineering programs.

5. We aim to provide a high-quality education to our diverse student population through excellence and innovation in teaching and research in order to serve the scientific and engineering needs of the state of Texas and the nation.

Student to faculty ratio

UNT is a Tier One research university located in Denton, TX.

Faculty Spotlight

Dr. Maurizio Manzo is an Assistant Professor of Engineering Technology. He is the Director of the Photonics, Micro-Devices Fabrication Lab, and his research interests include sensor development, instrumentation and flow diagnostics, and biomedical micro-devices.
Our Program

The University of North Texas’ Department of Engineering Technology offers course work leading to:

- Master of Science in Engineering Technology, requiring 30 to 33 hours.
- Concentrations include Construction Management, Engineering Management, and Mechanical Systems.

Admission

Our graduate program is open to high-achieving students from engineering backgrounds. Successful applicants to this program should:

- Apply through www.applytexas.org.
- Submit transcripts demonstrating a cumulative GPA of at least 3.0 on undergraduate coursework.
- Submit competitive GRE scores. GRE is waived for applicants that hold an ABET-accredited bachelor’s degree.
- Submit proof of English language proficiency (international students only). Acceptable scores are 79 on TOEFL and 6.0 on IELTS.
- Take appropriate leveling courses if they have degrees outside of engineering.

Visit etec.unt.edu/graduate/admissions for more information.

Funding Opportunities

Teaching and research assistantships provide support for many graduate students. In addition to a monthly stipend, assistantships also qualify students for in-state tuition rates, and many students receive tuition and fee support.

Scholarships are available to graduate students as well. The general scholarship deadline is March 1 of each year. The Department of Engineering Technology also offers scholarships to qualified students throughout the year.

Research Opportunities

Faculty and student researchers in the Department of Engineering Technology use known or emerging technologies and apply advanced science, engineering, and mathematics to solve today’s toughest industrial problems. Some of our research areas are below.

- Cold Form Steel application as structural materials
- Structural resilience and structural health monitoring
- Atmospheric corrosion of structural materials
- Digital Manufacturing Laboratory
- Photonic micro-device fabrication Laboratory
- Laboratory for Laser Assisted Additive Manufacturing
- Mechanical properties evaluation of nanoscale materials
- Materials Synthesis and Processing Laboratory
- Minimum quantity lubrication and green lubricant development
- Thermal Management Laboratory
